Assignment 4 - Writing Assignment, due Nov. 10th in class.

Submit a paper, 5 pages or more, plus bibliography, on the historical and possibly philosophical context of Georg Cantor’s work on transfinite numbers and its aftermath. Of special interest would be the reactions of some of the leading mathematicians of the day, such as Kronecker, Weierstrass, Dedekind, Hilbert, and Poincare. Use a separate page for the bibliography. The bibliography can include the Davis, Aczel, and Moore books on reserve, but should also include at least one other written work (not internet based). The Bobst Library is equipped to help you on projects such as this.
